PRACTICE GROUP MEMBERS

Damon & Morey LLP is recognized as a major litigation firm in the area of insurance defense, and we excel in all aspects of insurance law and litigation. The firm's Insurance Defense Group includes a staff of 30 experienced insurance attorneys, who aggressively work to resolve claims and coverage concerns in such areas as:

- Bad Faith Claims
- Excess and Surplus Lines
- General Negligence
- Property and Casualty Insurance
- Reinsurance Matters
- SIR Disputes

We handle all forms of tort litigation for insurers and self-insured corporate clients including automobile, comprehensive general liability, professional errors and omissions, officers and directors liability, municipal liability, product liability, toxic tort, transportation, environmental claims and coverage, securities litigation, life, health and accident, fire, extended coverage, and homeowners.

Damon & Morey's insurance attorneys handle proceedings before administrative entities, including matters pertaining to OSHA, hospital licensing certificates of need, medical malpractice and worker's compensation claims. Our attorneys have a strong history of reducing claim exposure by identifying and addressing areas of potential conflict before they become problems or before they result in litigation.

Our attorneys actively share their knowledge of insurance law and coverage with clients through ongoing seminars and workshops and by offering assistance with the drafting of specialized policy language, claims-handling materials and guidelines.

Damon & Morey engages in all phases of trial and appellate practice on both the Federal and State level. Through our effective management of complex multi-party cases and our ability to litigate cases to successful verdicts, Damon & Morey has earned its place as one of the top litigation firms in Western New York.

While we take pride in our ability to avoid the expense of unnecessary litigation through the successful use of arbitration, our attorneys stand ready to vigorously defend our clients against unfounded claims using all the experience, staff and resources available to us.
