The number of claims against municipalities, as The Medical Device & Pharmaceutical Practice Area represents local and multi-national businesses and research institutions in matters involving the financing, regulation, marketing and sale of our clients' products and processes. This practice area includes a team of experienced lawyers drawn from its corporate, litigation, FDA, and health care groups.

Our attorneys have dealt with IRBs, clinical trials, as well as medical device and pharmaceutical development issues. This group also manages complex products liability cases in state and federal courts involving design, manufacture and sufficiency of warnings.

Damon & Morey's attorneys are nationally recognized for their unique knowledge and experience in the scientific and medical field. Members of the group include several nurse-attorneys, including a past-president of the Nurse-Attorneys Association. Furthermore, as counsel for Buffalo's most prestigious hospitals and physicians' groups, Damon & Morey has vast experience in litigating complex medical cases and has developed close relationships with members of the scientific and medical communities.

Damon & Morey has experience with such topics as:

- Prescription drugs
- Over-the-counter drugs
- Hospital equipment
- Surgical equipment
- Pediatric surgical equipment
- Physical therapy equipment
- Oxygen tanks
- Dental products
- Medical food supplements
- Blood products
- Prosthetic devices
- Process protection
- Pedicle screws
- Breast implants
- Mobile CT and MRI units
